Machine Learning.

Logistic Regression, and ChatGPT.

Sila. September 1st, 2023.

In groups of 2 -3.

Exercise A.

Ask ChatGPT what Logistic Regression is. And let ChatGPT explain it in a simple way.

Discuss the answer from ChatGPT in the group. And make sure that you all understand the answer.

Exercise B.

After you have trained you model, how can the model be used to decide where a new point belongs? How is this calculated?

Let ChatGPT explain! And discuss its answer afterwards.

Exercise C.

Ask ChatGPT for at least 5 examples of where logistic regression is used. And let ChatGPT explain how, in case you are uncertain about the use.
